PROFILE

Product and technology executive combining deep music-industry expertise with leadership of complex digital platforms and international product organizations. Currently lead BMG's Technology Product organization, with responsibility for 50+ products across rights, royalties, digital supply chain, licensing and customer-facing music platforms, and approximately €17m in annual technology investment.

Career spans the intersection of music and technology — from music production, digital content and distribution to copyright and licensing platforms and, today, enterprise-scale product leadership. Led major platform transformations from monolithic legacy systems to cloud-native microservices and event-driven architectures while building product organizations, governance models and modern AI-enabled product practices.

CORE EXPERTISE

Product Leadership Music Technology Portfolio Strategy AI Enablement Rights & Royalties
Digital Supply Chain Cloud & Microservices APIs & Headless Architecture Governance
Vendor Management Technology Investment Licensing & Sync

EXPERIENCE

BMG — The New Music Company, Berlin

Senior Director Technology Products / Head of Product

July 2023 to present

Lead BMG's Technology Product organization and a portfolio of 50+ products and applications spanning rights, royalties, digital supply chain, licensing, finance, client services, marketing and corporate functions, including customer-facing platforms such as myBMG, BMG Production Music and BMG Sync Plus.

- **Product & Portfolio Leadership:** Lead an international product organization with 5 direct reports and ~10 extended/external team members across Europe, the US, Middle East and India. Oversee ~€17m in annual technology investment, strategic technology vendors and external development partners.

- **Rights & Royalty Transformation:** Led the transformation of BMG's copyright and royalty technology landscape away from monolithic, vendor-dependent systems toward a cloud-native microservices architecture, enabling faster development, independent deployments, continuous delivery, parallel royalty processing and greater scalability.
- **Event-Driven Platforms:** Led the introduction of Pub/Sub-based asynchronous integration across the microservices landscape, replacing legacy message-queue patterns and improving reliability and independence between domain applications.
- **Architecture & API Strategy:** Co-founded BMG's Architecture Board with Cloud and Data leadership and oversee adoption of headless architecture principles across the Product portfolio, including AI-ready APIs for downstream products, business users and emerging agentic use cases.
- **AI Enablement:** Lead adoption of generative AI within Product, embedding AI into discovery, analysis and prototyping and introducing reusable skills and agentic workflows, while partnering with Engineering on AI-assisted development, code review and delivery standards.
- **Digital Experience Modernization:** Oversaw the transition of BMG's web and content ecosystem from Magnolia to a reusable Contentful-based headless platform, alongside portfolio oversight for the 2026 launch of BMG Sync Plus.
- **Product Organization & Governance:** Built and developed Product as a dedicated function within Technology and established a portfolio prioritization framework, company-wide Product Days and quarterly product reviews to strengthen investment discipline, transparency and product culture.

Director Business Services

Jan. 2023 to July 2023

Expanded responsibility for strategic vendor management, commercial negotiations and technology contracts while continuing to lead the iMaestro transformation and Business Services product portfolio.

Senior Product Owner Business Services

May 2022 to Dec. 2022

Joined BMG with a mandate to lead the decommissioning and modernization of iMaestro, BMG's legacy monolithic copyright and royalty platform, transitioning critical capabilities toward a modular, cloud-native product landscape.

ICE — International Copyright Enterprise / ICE Services GmbH

Product & product ownership roles

Oct. 2015 to April 2022

Senior Product Owner (2020–2022) · Product Owner (2018–2020) · Business Analyst (2016–2017) · Senior Product Manager, Online Operations (2015–2016)

- **Product Ownership:** Owned roadmap, backlog and delivery for an import platform and a licensing platform, working with two cross-functional Scrum teams consisting primarily of external developers.

- **Rights & Licensing Technology:** Translated complex copyright, licensing and operational requirements into scalable product capabilities for collecting societies and music publishers.
- **Stakeholder Management:** Aligned priorities across business, technology, customers and shareholders in a complex international multi-stakeholder environment.

freenet digital / Jesta Digital / Fox Mobile Distribution / Jamba, Berlin

Product management, content operations & team leadership

2008 to 2015

Progressed from music content operations and team leadership into Product Management, combining digital music, technology, partner integration and product development.

- **Music, Content & Platforms:** Managed digital content and metadata across music, audio, visual and video products, including ingestion, licensing, APIs/frontends and internal content-management tools.
- **Product & Technology:** Worked as Product Owner and Scrum Master within cross-functional development, shaping product direction and technical roadmaps before moving into Product Management for mobile products.
- **Leadership & Partner Delivery:** Led a team of up to seven people and coordinated international launches across Engineering, QA, labels, distributors, external partners and service providers.
